ALAMDAR HUSSAIN

SOLUTION ARCHITECT AND DELIVERY MANAGER

Karachi, Pakistan | 0332 3317083 | alamdarhussain.dev@gmail.com | linkedin.com/in/alamdar-hussain

PROFESSIONAL PROFILE

Solution architecture and delivery leader with 12+ years of experience designing, building, integrating, and operating business-critical software across banking, payments, healthcare, and enterprise services. Combines hands-on .NET and distributed-systems expertise with team leadership, stakeholder management, regulatory delivery, release governance, and production support. Experienced translating business objectives into practical architectures and guiding cross-functional teams from discovery through deployment and operations.

LEADERSHIP & ARCHITECTURE STRENGTHS

Solution architecture Microservices, distributed systems, integration patterns, APIs, architecture reviews	**Delivery leadership** Roadmaps, estimation, release planning, cross-functional teams, stakeholder alignment
Financial platforms Digital banking, Raast, bill payment, omni-agent, reconciliation, ISO 20022	**Operational excellence** DevOps, CI/CD, Kubernetes, observability, resilience, incident resolution
Governance & quality SBP alignment, ISO 20022, secure coding, audit trails, testing, code review	**Engineering** ASP.NET Core, REST APIs, Oracle, SQL Server, messaging, performance tuning

SELECTED SOLUTION DELIVERY

Digital banking platform - Bank AL Habib: Contributed to solution design, microservices delivery, deployment, integrations, production support, and high-availability Kubernetes operations.

Raast instant payments - United Bank Limited: Led integration into digital banking, coordinating design, SBP-aligned testing, deployment, transaction reconciliation, and production readiness.

Bill Payment & Omni Agent systems - United Bank Limited: Managed partner onboarding and enhancements, end-to-end workflow testing, and stable production releases.

PROFESSIONAL EXPERIENCE

Senior IT Specialist

May 2025 - Present

BANK AL HABIB LIMITED

Solution delivery and production ownership for digital banking services in a regulated financial-services environment.

- Lead development, deployment, release planning, and production support for the digital banking platform.
- Contribute to high-availability Kubernetes architecture and containerized delivery across Dev, QA, UAT, and Production.
- Work across business, QA, infrastructure, middleware, security, and DevOps teams on architecture decisions and operational stability.
- Support CI/CD, observability, proactive issue resolution, and enterprise integration; delivered credit-card module and customer-communication workflows.

Manager Software Development

Jun 2022 - Apr 2025

UNITED BANK LIMITED

Managed software development and delivery for digital banking payment and partner-service capabilities.

- Led integration of Raast into digital banking, aligning system design, testing, deployment, and production support with regulatory requirements.
- Directed enhancements to Bill Payment and Omni Agent systems, including company onboarding, complex workflows, and release coordination.
- Implemented transaction reconciliation and resolved data discrepancies across payment platforms.
- Managed a cross-functional team; coordinated business, technical, infrastructure, and security stakeholders and maintained secure delivery practices.

PROFESSIONAL EXPERIENCE - CONTINUED

Senior Software Engineer
Dec 2021 - May 2022

THE KIDNEY CENTRE

Developed healthcare software and reporting solutions for hospital operations and clinical teams.

- Delivered a Clinical Data Management System to support collection, storage, and analysis of clinical data.
- Applied MIS and Power BI reporting to improve operational visibility and data-informed decisions.
- Built with ASP.NET Core, SQL Server, JavaScript, and reporting technologies.

Software Engineer
Aug 2019 - Dec 2021

LIAQUAT NATIONAL HOSPITAL

Built and supported hospital applications, websites, integrations, and point-of-sale services.

- Delivered hospital website and academic journal platform; developed POS capabilities for billing and transaction workflows.
- Built REST/SOAP integrations and distributed services; worked with RabbitMQ, Redis, Prometheus, and Grafana.
- Partnered with clinical and IT teams on requirements, implementation, training, privacy, and support.

Senior Software Engineer
May 2018 - Jul 2019

INTELLIGENES

Designed and delivered enterprise software capabilities for regulatory and board-governance workflows.

- Enhanced regulatory compliance and reporting features; integrated secure messaging and document storage into a board portal.
- Mentored engineers and contributed to architecture, quality, testing, and issue resolution.
- Technology included ASP.NET MVC, OAuth, Azure Blob, MongoDB, Redis, and JMeter.

Senior Software Engineer
Aug 2017 - Apr 2018

AXACT

Designed and delivered tailored software applications and supported engineering quality.

- Built an auction-house management solution using .NET Core, Entity Framework, and Angular.
- Contributed to system design, testing, mentoring, and delivery.

Software Engineer
Oct 2015 - Jul 2017

MATTS TECHNOLOGIES

Developed client-specific applications across business, CRM, banking, retail, and IoT use cases.

- Contributed to Wi-Fi based home automation, SMD implementation, CRM enhancement, and AME web solutions.
- Worked with clients from requirements through design, development, testing, and maintenance.

Software Engineer
Mar 2015 - Sep 2015

INFINITE BYTES

Delivered custom software for a telecommunications company and supported client requirements.

- Contributed to a dynamic ERP generation business solution; performed requirements analysis and technical support.

EDUCATION & CERTIFICATION

Master of Engineering, Computer Systems - NED University of Engineering and Technology, Karachi | 2017 - 2019

Bachelor of Science, Computer Engineering - Sir Syed University of Engineering and Technology, Karachi | 2011 - 2014

ITIL Foundation (Version 5) - PeopleCert | Effective 16 October 2026 | Renewal by 16 October 2029

TECHNOLOGY

Architecture & integration: Microservices, distributed systems, REST APIs, SOAP, RabbitMQ, Refit
Cloud & delivery: Kubernetes, Docker, Azure DevOps, Jenkins, Git, GitHub, GitLab, Bitbucket, TFS
Platforms & data: .NET, ASP.NET Core, Windows Services, Linux, Oracle, SQL Server, MongoDB, Redis
Observability & quality: Prometheus, Grafana, Elasticsearch, Kibana, JMeter, Postman, Swagger, SonarQube
